Education

The Chinese University of Hong Kong

Aug 2022 – Jul 2026

Bachelor of Engineering in Artificial Intelligence: System and Technologies

Department of Computer Science and Engineering

Skills

- **Programming:** Python, Java, JavaScript/Typescript, C/C++, SQL, Kotlin
 - **Software Engineering:** Object-Oriented Programming, Data Structures & Algorithms, RESTful APIs
 - **Backend:** Java Spring Boot, Node.js, FastAPI, PostgreSQL, SQL
 - **Frontend:** React, JavaScript/Typescript, HTML/CSS, Tailwind CSS
 - **Development Tools:** Git, Docker, Linux, Azure, Cursor, Firebase
 - **AI/ML:** LLMs, RAG, LangChain, PyTorch, TensorFlow, OpenCV, YOLO
-

Work Experience

Gekko Artificial Intelligence Limited

Software Engineer Intern

Jun 2026 – Jul 2026

- Design deployment workflows for Ubuntu Pro in air-gapped client environment.
- Evaluated enterprise deployment solutions, including SMTP relay and MS Teams Bot rate limiting.

iASPEC Service Limited

Software Engineer Intern

Jun 2025 – Aug 2025

- Developed frontend features for an AI-powered testing SaaS platform with React/Tailwind CSS
 - Implemented Fast API APIs and business logic for AI-assisted testing services.
 - Contributed ~300 commits across production features, bug fixes, and optimizations.
-

Selected Projects

LLM Hallucination Detection and Mitigation with Zero-Shot methods

- Developed a zero-shot LLM hallucination detection framework with strategies without supervised data
- Conducted experiments to analyze model reliability and hallucination patterns.

FocusFlow AI — Full-Stack AI Task Management Application

- Developed a full-stack task management application using **Java Spring Boot, React and PostgreSQL**, with RESTful APIs for authentication and task management.
- Implemented **Spring Security, session-based authentication and CSRF protection**
- Integrated **OpenAI APIs** for AI-assisted daily to generate daily plans from users' active tasks.
