Education

The Chinese University of Hong Kong

Aug 2022 – Jul 2026

Bachelor of Engineering in Artificial Intelligence: System and Technologies

Department of Computer Science and Engineering

Skills

- **Programming:** Python, Java, JavaScript/Typescript, C/C++, SQL
 - **Machine Learning:** PyTorch, , scikit-learn, Hugging Face, Neural Networks, Deep Learning
 - **Computer Vision:** OpenCV, YOLO, Object Detection, Image Processing, Tracking
 - **Generative AI:** LLMs, RAG, Prompt Engineering, LangChain, LangGraph, Vector Databases
 - **Data / Analytics:** NumPy, Pandas, Matplotlib, SQL, PostgreSQL
 - **Software Engineering:** FastAPI, RESTful APIs, Git, Docker, Linux, Cursor, React
-

Work Experience

Gekko Artificial Intelligence Limited

Software Engineer Intern

Jun 2026 – Jul 2026

- Explored deployment workflows for Ubuntu Pro in air-gapped enterprise environments.
- Evaluated enterprise deployment solutions, including SMTP relay and MS Teams Bot rate limiting.

iASPEC Service Limited

Software Engineer Intern

Jun 2025 – Aug 2025

- Developed frontend features for an AI-powered testing SaaS platform with React/Tailwind CSS.
 - Implemented FastAPI endpoints and business logic supporting LLM-assisted test case generations.
 - Contributed ~300 commits across production features, bug fixes, and optimizations.
-

Selected Projects

LLM Hallucination Detection and Mitigation with Zero-Shot methods

- Developed a zero-shot LLM hallucinations in RAG scenarios without the need for model training
- Designed and evaluated multiple detection strategies analyze reliability and hallucination patterns.
- Achieved 90% of the performance to judge-based baselines with much lower computational cost.

GTA V ALPR (Automatic License Plate Recognition)

- Built a YOLO-based ALPR pipeline using PyTorch and OpenCV, for both detection and recognition
- Created and annotated a 1,200+ image dataset with augmentation to improve robustness.
- Achieved 80% for detection and recognition accuracy under varying conditions.
